

# GLUCOSAMINE HCl 12,000 XTRA STRENGTH POWDER

## For Equine Joint Health

Glucosamine HCl 12,000 is a great value joint and mobility supplement for all horses and ponies.

- Contains a full 12g Glucosamine Hydrochloride per 30g serve.
- Provided from Glucosamine Hydrochloride (HCl) - backed by research.
- Also provides MSM and Hyaluronic Acid (HA).
- Great value joint and mobility support for all horses and ponies.

**Glucosamine 12,000 provides key nutrients to help maintain healthy cartilage and synovial fluid, supporting joint health and mobility.**

Glucosamine HCl is supported by research and has greater purity and stability properties compared to glucosamine sulphate, providing over 20% more glucosamine on a weight for weight basis. This means, 12,000mg of glucosamine HCl (a typical daily serve), is not the same as 12,000mg of glucosamine sulphate. Glucosamine HCl is typically 83% actual glucosamine and glucosamine sulphate is typically only 60% actual glucosamine. Therefore, a supplement providing 12,000mg glucosamine HCl per serve actually provides 10,300mg glucosamine, whereas a supplement stating 12,000mg glucosamine sulphate per serve only provides 7200mg actual glucosamine.

### Key Ingredients Per 30g Serving:

Glucosamine HCl	12000mg
MSM	1650mg
HA	9mg

**Composition:** Dextrose, Glucosamine hydrochloride, Methylsulphonylmethane (MSM), Hyaluronic Acid.

### Analytical Constituents:

Crude Protein	18.2%	Crude Fibre	<1.0%
Crude Fat	<1.0%	Crude Ash	10.3%
Sodium	<1.0%		

**Pack size:** 1kg (66 day supply).

**Directions for use:** For 500kg horse: for initial 10 days, 30g per day. Thereafter, may be reduced to 15g per day, to maintain the desired response.
